

TEAM TRAMPOLIN

A student technology team from Prague

Cybersecurity, AI, websites, games, education, and video. We explore ideas through prototypes, competitions, and creative work for clients. Founded in January 2026 at Gymnázium Amazon.

2nd

EVOHACKS 2026

3rd

DemocraTICon 2026

6

videos / 3 property projects

SELECTED WORK

ClearMessage

A research prototype for understanding suspicious messages. 2nd place at EVOHACKS. The public demo replays a recorded result.

AI real estate video

Three projects and six videos for a RE/MAX agent: possible renovations, building visualisations, and the atmosphere of a lived-in home.

Websites & school tools

Website studies, Academic Vanguard for choosing school-leaving exam seminars, and an information site for the Berlin 2026 school trip.

DOOM Bounce

A browser game with custom bosses, AI animations, and voiceovers. An experiment in building a game inspired by classic DOOM.

AI radio

September 2026 MVP. Broadcasting is paused while we develop a more sustainable version, benchmark models, and prepare a planned paper.

PEOPLE & COLLABORATION

Hugo Kubíček leads the team and built the other portfolio projects. Daniel Voženílek and Vojtěch Čákrť worked with him on DemocraTICon. We welcome new members, client briefs, internships, mentoring, and support for concrete experiments.
